EDUCATION

Master of Computer Applications, GM University, Davangere 2024 to 2026
CGPA 8.6 out of 10
Bachelor of Computer Applications, Bapuji Institute of Hi Tech Education, Davangere 2020 to 2023
CGPA 8.8 out of 10
Relevant coursework: Data Structures, Operating Systems, DBMS, Computer Networks, OOP with Java

PROJECTS

AI Career Counselor, resume skill gap and roadmap app | *Python, FastAPI, Groq LLM, React, TypeScript, Supabase PostgreSQL* GitHub

- Reads a PDF resume with PyMuPDF and a Groq LLM that returns structured JSON, so the skills can be checked against a target role.
- Compares those skills with a knowledge base of over 1000 careers from O NET using vector embeddings, to find skill gaps and missing prerequisites.
- Builds a weekly learning roadmap from the target role, study hours and RIASEC profile.
- Async FastAPI backend with a React and TypeScript front end, with data stored in Supabase PostgreSQL.

ScholarSense AI, scholarship risk assessment with OCR | *Python, Flask, Tesseract OCR, OpenCV, scikit learn, MySQL, Chart.js* Demo GitHub

- Students upload scholarship documents and the app reads the details with Tesseract OCR and OpenCV.
- Trained a scikit learn model that flags risky applications, about 95 percent accuracy on the test data.
- Built separate dashboards for students, college admins and the super admin, with Chart.js reports from MySQL.

EXPERIENCE

Software Developer Intern March 2026 to August 2026
Gem Ventures LLP, GMU Intelligent Voice Assistant for ERP GitHub

- Built a voice assistant for the university ERP: students ask about attendance, fees, results, certificates and bus timings by voice, in English, Hindi, Kannada or mixed language.
- Built the React.js screens and connected the React.js and Flutter apps to PHP REST APIs and MySQL, using Vapi, Deepgram and OpenAI for voice, speech to text and replies.
- Fixed CORS and session errors, duplicate tool calls and background noise misfires, tracing each one with logs, browser network tools, MySQL checks and ngrok webhook tests.
- Later moved the voice flow to a Node.js WebSocket pipeline for lower latency audio streaming.

OPEN SOURCE AND HACKATHONS

- 32 merged pull requests across 9 projects, including TheAlgorithms/Java and mars sim: bug fixes, null safety and edge case handling, backend features and CI checks.
- Smart India Hackathon: team built a rockfall risk prediction model for open pit mines. I did the data cleaning, feature selection and classifier training (about 80 percent accuracy). GitHub
- Presented a project at the State Level Pragna project presentation.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL, PHP, Dart
Backend and Web: FastAPI, Flask, Node.js, REST APIs, WebSockets, React.js, Flutter, PostgreSQL (Supabase), MySQL, MongoDB
AI: LLM APIs (Groq, OpenAI), structured JSON output, embeddings, retrieval augmented generation, LangChain, Chroma, scikit learn, Tesseract OCR, OpenCV, Vapi, Deepgram
Tools: Git, GitHub, VS Code, ngrok, Kaggle
Problem solving: 130 plus LeetCode problems solved in Java
Certifications: Full Stack Java Development, Tap Academy, Bengaluru. Soft Skills Training, Sarthak Institute.
